

## **Sample Business Requirement Document Template**

### **Identify The Problem :**

**Today Mr. Ajay from Sonai came to us with his problem regarding his agro nursery .**

### **Executive Summary Snapshot :**

**Mr. Ajay is from sonai he have agro nursery. In which they provides crop saplings to farmers as per the requirement of the the farmers. I asked him his measure problems. He is facing two measure problems in his business. He told us that he do not have any online platform to take orders and do not have any record keeping software in their nursery. According his problem we have to develop a software or website to take orders and keep records of his nursery.**

**After analysing his problem, I told him that we need some time to do survey.**

**I also told him to give me five day to discus his problems with our team and experts and after five day we will give total details regarding his problems.**

### **Prepare Project Discription :**

**As per the problem of the Mr. Ajay we form the committee of four expert and skilled members, who will carry out all work regarding the problem of Mr. Ajay. In that committee of four members first one expert is Supervisor who will supervise the whole project .**

**Second expert is Financial analyst who will look after the financial issue and financial requirement of the project. Third one is Technical**

**analyst who will manage technical work related to the project and solve technical problems. Forth one is software developer who will develop the software regarding the project and all work related to coding is with him. All the committee members discuss on the project and how to carry out this task and also the how to make profit.**

**Why to take project ?**

**To handle the work regarding the nursery in easy way.**

**To make available online platform to customer to carry out their task in limited time and easily.**

**To keep records in proper manner.**

**Project scope :**

**The main goals of project to reach more consumers.**

**To make advertisement of the business.**

**To make easy platform for the people to place orders regarding to the agro nursery.**
